

# Accreditation Worldwide

***Test reports from laboratories accredited by International Accreditation New Zealand are accepted by 67 accreditation bodies in 52 economies***

## INTERNATIONAL ACCREDITATION

Most trading nations have established systems to accredit technically competent and reliable inspection, measurement and testing facilities. These accreditation authorities are usually government-owned or government-endorsed and operate free from any commercial influence.

A total of sixty-eight accreditation authorities in fifty-three economies, including IANZ in New Zealand, have established an international network of Mutual Recognition Arrangements (MRAs), based on regular peer evaluations against the international standard ISO/IEC 17011:2004 *General requirements for bodies providing assessment and accreditation of conformity assessment bodies*.

Mutual Recognition means that each partner agrees to recognise accreditations granted by the other partner(s) as equivalent to their own. They enable test and inspection reports from the exporting country to be accepted in the importing country, avoiding requirements for re-testing and saving exporters time and money.

Accreditation operates in both the voluntary and regulatory sectors worldwide. Laboratories and inspection bodies are not required by law to be accredited, but accreditation is increasingly recognised by regulators worldwide as evidence of competence to carry out testing or inspection for mandatory purposes.

## REPRESENTING NEW ZEALAND

International Accreditation New Zealand (IANZ) is a crown entity established under the Testing Laboratory Registration Act, 1972. It is the national authority for the accreditation of testing and calibration laboratories, inspection bodies, and radiology services. IANZ is funded from client fees.

IANZ represents New Zealand in the International Laboratory Accreditation Cooperation (ILAC), which groups nationally recognised accreditation authorities worldwide, and in the regional grouping, Asia Pacific Laboratory Accreditation Cooperation (APLAC). APLAC is recognised by regional governments as a Specialist Regional Body within Asia Pacific Economic Cooperation (APEC).

## THE ACCREDITATION NETWORK

### Asia Pacific

Within the Asia Pacific region, APLAC has established a multilateral Mutual Recognition Arrangement linking twenty-six accreditation authorities in seventeen economies:

*Australia; Canada; People's Republic of China; Hong Kong, China; India; Indonesia; Japan; Republic of Korea; Malaysia; Mexico; New Zealand; The Philippines; Singapore; Chinese Taipei (Taiwan); Thailand; United States; Vietnam.*

IANZ is a founding signatory to this regional MRA, which replaces earlier bilateral arrangements with some of the economies mentioned above.

### Europe

Within Europe, the regional grouping, European cooperation for Accreditation (EA) has established a multilateral MRA linking thirty-one accreditation authorities in twenty-seven economies: *Austria; Belgium; Czech Republic; Denmark; Estonia; Finland; France; Germany; Greece; Ireland; Italy; Latvia; Lithuania; Malta; The Netherlands; Norway; Poland; Portugal; Romania; Slovak Republic; Slovenia; Spain; Sweden; Switzerland; Tunisia; Turkey; United Kingdom.*

IANZ has full Mutual Recognition with all of the signatories to this regional MRA, which replaces earlier bilateral arrangements with some of the economies mentioned above.

## **International**

Signatories to the Asia Pacific (APLAC) and Europe (EA) MRAs, as well as some economies outside these regions, are signatories to the International (ILAC) MRA. ILAC signatories include *Argentina, Brazil, Costa Rica, Cuba, Egypt, Guatemala; Israel and South Africa.*

## **CONTACT DETAILS**

The logos and contact details of IANZ Mutual Recognition partners are in the following chart. New partners will be added as soon as peer evaluations are satisfactorily completed. For the latest listing, contact the International Manager at IANZ, phone (09) 525 6655, or visit our website [www.ianz.govt.nz](http://www.ianz.govt.nz).

## **THE IMPORTANCE OF ACCREDITATION**

Industry depends on reliable inspection, measurement and testing. Accurate test and inspection results are critical for the protection of public health and safety, the environment and to facilitate trade.

Accreditation by IANZ is formal recognition that an organisation is competent to carry out specific tasks. A laboratory or inspection body is accredited to issue specific types of test reports, inspection reports, technical service reports or certificates. The specific areas of competence are specified in the Scope of Accreditation (e.g. a laboratory may be accredited to undertake specific chemical tests but not to test electrical products).

IANZ accreditation is granted after detailed assessment of the competence of the organisation and its staff against defined technical and management system criteria. This assessment is conducted by IANZ staff in association with experts from the particular technology being assessed. Accredited organisations are subject to regular review.

Laboratories are accredited as complying with the international standard, ISO/IEC 17025: *General Requirements for the Operation of Calibration and Testing Laboratories*. Inspection bodies are accredited as complying with ISO/IEC 17020: *General Criteria for the Operation of Various Types of Bodies Performing Inspection*.

Accredited organisations are entitled to use the appropriate IANZ Accreditation logo with test or inspection results within their scope of accreditation.
